

TOPIGS NORSVIN CANADA INC. – INTERNSHIP PROGRAM OVERVIEW

About Us:

Topigs Norsvin is the leading swine genetics company renowned for its innovative genetic solutions for cost-efficient pig production. Research, innovation and fast dissemination of genetic progress are cornerstones of our company. We are committed to helping our customers to be successful in terms of production efficiency, meat quality, animal robustness and healthy, high productivity.

Topigs Norsvin Canada Inc. offers internship opportunities for students who are interested in gaining hands-on experience in the swine genetics and production industry. Interns gain direct experience working on meaningful projects while learning from professionals in the field.

Program Structure

Focus Area: Interns will undertake a research and development project within a leading global swine genetics organization.

Length: Internships can range from 10 weeks to 6 months or longer, depending on student availability and project scope.

Projects: Project intensity and scope will be tailored to match the length of the internship.

Support: To make the experience accessible, interns will receive a small stipend, housing and access to a vehicle.

Requirement: Proficiency in English is mandatory for all applicants.

Why Join?

This program gives interns the opportunity to gain practical, hands-on learning with a leading global swine genetics organization. Interns will develop valuable research, problem-solving, and communication skills while building experience that enhances both academic and professional growth. Most importantly, interns will contribute directly to innovation and progress in the swine industry, making their work impactful and rewarding.
